**Red hot genetics from an outstanding  
Durham daughter | Superb type  
Six generations of Excellent dams  
Incredible udders | Easy calving**

If exceptional type is what you seek, this bull will certainly catch your attention. Jotan is MASTERRIND's popular Red-hot Jordan son, straight from Kamps-Hollow Durham Altitude RC EX-95, making him a half-brother to the popular KHW Kite Advent-Red and the exciting Talent son KWH Elm-Park Acme RC also at MASTERRIND. Jotan was sampled in many of countries.

Jotan's outstanding type data (for example: GER 133, NL 114) confirms the great transmitting ability of the entire cow family. He combines that with good fat and protein percentages as well as excellent calving ease. Mated correctly, Jotan can make beautiful, fancy show-ring type cows.

Jotan daughter Jenna (2nd lactation), Germany

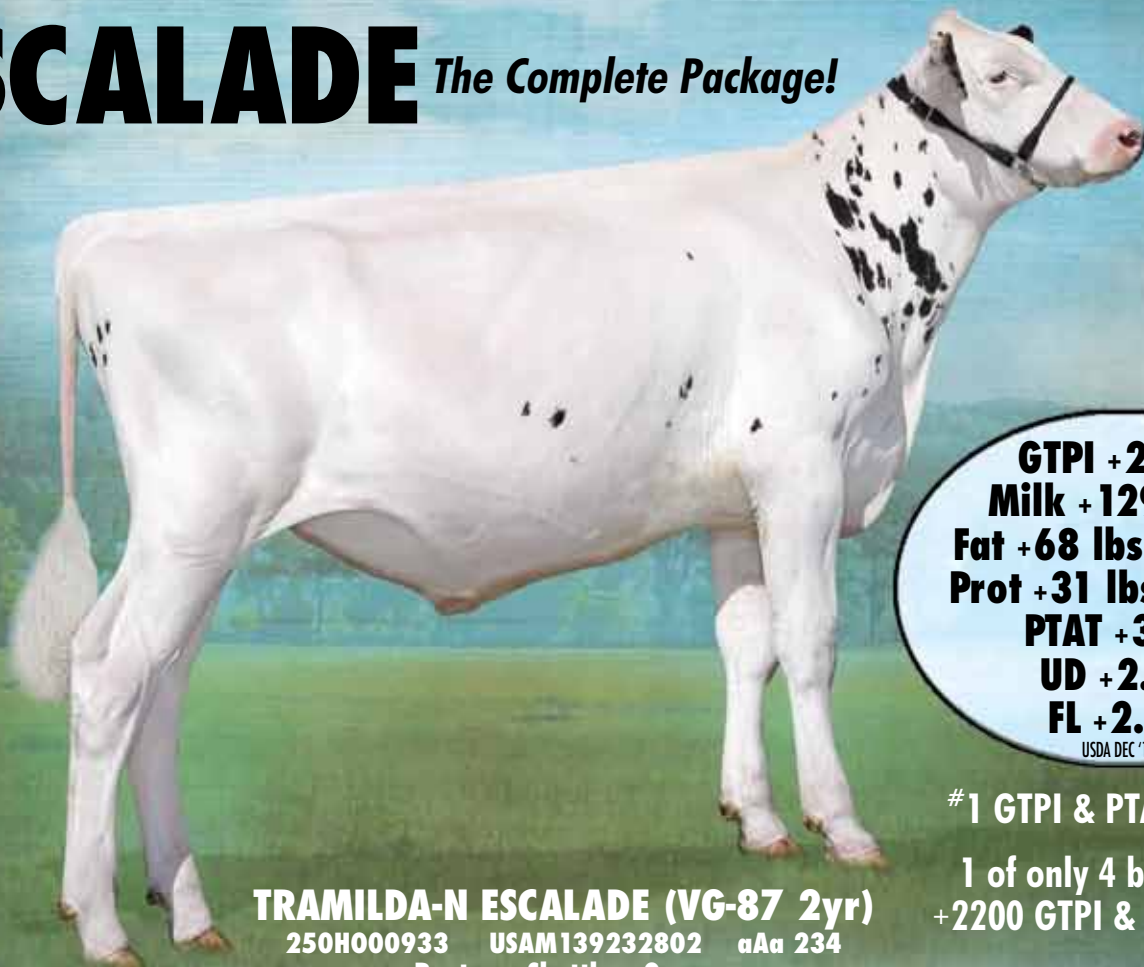

Jotan daughter Cloveredge Jotan 3453 – Red, USA

# Dear Holstein friends,

Every year, people dedicate themselves to New Year resolutions; doing more sports, giving up smoking, losing weight..... The people behind Hotspots have also got their personal goals for the year 2011, but people don't worry: Your Hotspots will become fatter and fatter!!

In January the Hotspots Team welcomed two new staff members; Jennifer Dingbaum working for Holsteinplaza and Andreas Mid-delkamp working for Holstein Select. We trust their activities will be a benefit for many breeders across the world.

In this issue we focus on the Queen of the Breed, Glenridge Citation Roxy EX-97, and her descendents. Well, highlighting this family automatically generates a big Hotspots! We are also proud to announce our first three pages for Holstein Plaza members; famous names and tremendous cows now represented as on the internet as well as in this magazine. They will proudly sell some of their best genetics in the first Holsteinplaza embryo sale at the end of February. We wish all consigners and bidders all the best for this sale.

In November we had our first online bull sale and as this magazine goes to print, we are already consumed with work for organizing the next one. We are encouraged by so many positive responses we received from all different angles of our industry on this new initiative.

This Hotspots issue also comes with a Bloodlines Poster. This way you can easily see how the top-end bulls today trace back to the greatest bulls of All Times - good bloodlines never hide! Enjoy reading this magazine, creating it for you was a true pleasure!

Best regards, The Hotspots Team

## Glenridge Citation Roxy

# → A Queen with many Crown Princesses

Having a Roxy in the herd is a proud achievement for many breeders across the globe. How often have we heard “she is a Roxy” while looking at a great cow? Thanks to so many different fantastic branches of the Roxy family, Glenridge Citation Roxy EX-97 4E GMD 6\* was the easy winner of both Queen of the Breed contests.

A cow with an illustrious career, Roxy was born in 1968 at the Glenridge Farm, Grenfell, Saskatchewan, before selling to Bob Miller, Mil-R-Mor Farm. Roxy was integrated into the Mil-R-Mor herd in the U.S. just before calving with her sixth calf, an Elevation daughter, Mil-R-Mor Roxette EX at the age of seven years and nine months. Roxette herself continued the legacy leaving many powerful, highly scored daughters. She became Canada's first 30 star brood cow and scored 20 stars in the UK where she had many fans after leaving 11 of 22 daughters scored Excellent. Roxette moved first to Bond Haven, where she bred a Dixiecrat daughter, Bond Haven Dixie Rox who superseded her dam as an EX-93 2E 52\* after moving to the UK. But it was at Hanoverhill where Mil-R-Mor Roxette bred no less than 30 daughters; leading to many of the different lines we see still succeeding in the breed today.

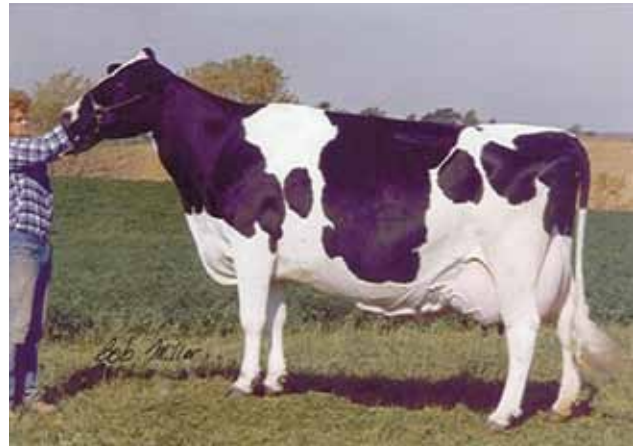

It was also at Hanoverhill that Roxette was mated to Starbuck resulting in Hanoverhill Raider, a very influential bull across Canada and the United States in the mid-1990's. A full sister to Hanoverhill Raider is Hanover-Hill Star Roxy EX-92 2E. Star Roxy was twice nominated All-American and had four EX-94 offspring, three daughters and one son.

These days we see the Roxy's all over the world with great results in the show ring, bulls hitting the top Genomic rankings and family members selling for sky-high prices at auctions. All out of different branches, which trace back to the one and only QUEEN; Roxy!

We all know about the great history of the Roxy from the past, let's have a closer look at the most interesting Roxy's from the present!

### Scientific Debutante Rae RC

The name Debutante Rae is one of the Roxy names to come up most often in recent years. Debutante Rae is one of those great Durham daughters that everybody likes to think stamped them out from the rest of the herd. She made a statement with her great type in 2005 when she was named Reserve Grand Champion of the International Holstein Show at World Dairy Expo. To further add to her type cred-

### The Facts

- Queen of the Breed I & II
- Member of the All-American Produce of Dam '77, '78 & '79
- Member of the All-American & All Canadian Get of Sire '79
- 1st cow of the breed to have 10 Excellent dtrs
- International Cow of the Century 1999
- Dam of the 1st 30\* STAR brood cow in Canada
- 7 of her EX daughters earned Gold Medal Status
- Dam of 16 EX daughters
- She has 3 descendents with 15 or more EX Dtrs! (Roxette 17, Lana Rae 15 & Integrity Robin 15)
- The only 4 Generation direct line group of cows with more than 11 EX dtrs: Roxy 16, Roxette 17, Dixie Rox 11, Bstar Roxie 12! (Interesting note, each generation was in a different country!)
- Highest production Roxy is Brigeen Convincer Rhonda EX-95, 66,320 lbs milk in 365 days
- Highest Classified Roxy female is C Hanoverhill Tony Rae EX-96
- Highest Classified Roxy male is Sir Ridgedal Rustler Red EX-97
- Roxy has more than 300 EXCELLENT descendents

its, she completed the seventh generation Excellent Roxy in a row. Thanks to her maternal grand sire, Meadolake Jubilant, Debutante Rae is also blessed with the Red Carrier gene which meant an extension of her popularity as a source of extremely interesting progeny for Red & White breeding. Her influence has been such that in 2010, Debutante Rae was named Holstein International's 'Red Impact Cow of the Year', as voted by the readers.

Now, after we have started to see her great offspring coming through the ranks, we can easily note that Debutante Rae will be a great Crown Princess for this family. The first cross on her was a 100% hit. Pursuit September Storm \*RC was used and resulted in three females (EX-91,

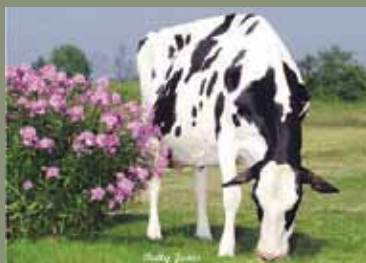

**Scientific Debutante Rae RC EX-92-USA**  
Res. Grand Champion WDE 2005. Bringing the great Roxy type together with skyhigh Genomics!

**Stardale Leader Roxy EX-95-UK 7E**  
3 grand dtrs in the European Top Genomic Rankings

**Brigean Integrity Robin EX-95-USA 2E**  
One of the highest scored Integrity dtrs in the breed

**Gloryland Liberty Rae EX-95-USA**  
Liberty Rae sold for \$ 410.000

EX-90 and VG-87) and two bulls, named Scientific Deuce \*RC EX-90 and Dusk \*RC EX-94. Both sampled through Select Sires and succeeded in making a big impact with both still being in the U.S. TPI Top 20 and PTAT Top 10 for Red & Whit (12/10). This successful bull line looks like it will continue with great promise for the future with Scientific Debonair EX-90, sired by Talent and at Select Sires. Debonair has a PTAT of +2.55 and have been heavily used in Red & White show breeding.

Debutante's Goldwyn son, Scientific Destry \*RC, is one of the most popular Genomic tested young sires of 2010. With GTPI +2127 and PTAT +3.02 (US 12/10) he is the highest bull available for Red & White breeding enthusiasts and can even compete with many of the Black & White bulls. His early progeny can already be found in the top ranking lists!

If we take the shortlist of Top Genomic Red or \*RC females, we can also predict a great future for Debutante's successors, demonstrating the great maternal line transmitted through the generations and endorsed by the Rae's. Right at the top of the Dec. 2010 listing, we can see Debutante's Shottle daughter, Scientific Darling Rae \*RC VG-2YR-USA with +2079 GTPI and +2.88 PTAT. She is followed by her Goldwyn sisters, Scientific Gold Dior Rae \*RC VG-89-2YR-USA in fifth place, Scientific Gold Demi Rae \*RC EX-90-USA in seventh place, Scientific Gold Doll Rae \*RC VG-87-2YR-USA in 16th and Scientific Gold Dish Rae VG-87-2YR-USA in position 20 on this list! These are great index cows in addition to the awesome type Debutante stamps her daughters with and at last count, there were already 21 Very Good and five Excellent daughters in the U.S. to date!

Roxy's influence in the Red & White breed is actually quite extraordinary, spanning beyond the Debutante influence to an Astre son of Hanoverhill Star Royal, STBVQ Rubens. Known for siring many winning daughters on the colored shavings, Rubens was named Premier Sire of the Grand International Red & White Show for five straight years 2004-2008.

## Roxy in Red

Another interesting Red Roxy is Golden-Oaks Perk Rae-Red-ET EX-90. Perk Rae is an eighth generation Excellent polled Roxy. This unique polled gene in combination with red and Roxy has made Perk Rae the cornerstone of the marketing program at Golden Oaks Farms. Perk Rae traces back to the Roxys through Scientific Beauty Rae-ET \*RC EX-90 who is sired by Rubens, then Jubilant Rae and Tony Rae. Sired by Perk-Red, Perk Rae has numerous daughters worldwide and sons at ABS Global, ABC Genetics and Trans-World Genetics.

## Stardale Leader Roxy EX-95 7E

One of the most popular brood cows in the U.K. right now was bred from an EX-91 2E Highlight Mr. Mark Cinder daughter of the imported Bond Haven Dixie Rox. Sharing extreme longevity with many of her predecessors, this Comestar Leader daughter has now produced over 100 tons of milk with her eighth lactation totaling almost 14,000 kgs in 305 days after a seventh lactation yield of 15,200 kgs at 5.27% fat and 3.29% protein for her current owners, the Willsbro herd. Leader Roxy has proven to be a solid investment. Purchased for 8,500gns at the 2006 Stardale Sale of the milking herd of Robert and

## R Peter Heffering (Hanoverhill Holsteins) about the Roxy's

### Getting into the family

"We felt that Roxy was one of the breed's great cows and probably the best daughter of Citation R. Elevation was making a lot of good offspring, so when the Elevation heifer was coming up for sale on the National Convention Sale we bought her as a foundation female for the herd. Roxette flushed well and turned out to be one of the strongest transmitting daughters of Roxy."

### Which branch of the Roxy's do you think is the best

"It is really difficult to answer that question without digging out the sale catalogs and doing some checking. Many breeders have had great success with the Roxy's. Look at Matt Nunes with the Tony Rae's and the dollars that cow has generated for him and the cattle that he has continue to be in demand. The addition of the Red Factor has really added another plus to the family. David Tait's Gloryland, the herd is nearly all Roxy's and Liberty Rae has that sweet Goldwyn daughter at Gillette's and Doug Nelson has some nice heifers coming from her. Look at what Briggs have been able to generate from the Integrity Robin cow. They produce the kind of cattle breeders want."

"The most important thing is that the Roxy's have produced quality cattle over a lot of years. This enabled the breeders to develop branches of the Roxy's in their own breeding program. The family gave them great cattle within their herds to work with and generate dollars in the sale of offspring and embryos in many countries around the globe. I think that is what **makes** them stronger today than they have ever been."

James Burrow, she has to date bred 16 daughters, 13 of which hold the Willsbro prefix, and her nine classified daughters have all scored Very Good or Excellent.

Willsbro sold her VG-87-2YR Shottle heifer (one of five classified Shottle daughters – all VG) at their headline sale in 2010 who was bought back by the Burrow family for 12,000gns. She is now due to calve with second calf, by Gillette Jordan in April. Another Shottle dtr is the the mother of Willsbro Garrett Roxy (U.S. 12/10 GTPI +2246), Europe's #12 GTPI Heifer.

## Gloryland Liberty Rae EX-95-USA

Another cow stamped with the Roxy mold of longevity and productivity and another successful Durham, Gloryland Liberty Rae EX-95 3E DOM. Gloryland Holsteins is yet another herd to benefit from this bloodline and Gloryland Liberty Rae is one of 15 Excellent daughters

all with Excellent mammary systems from Gloryland Lana Rae, completing eight generations straight Excellent. An EX-94 2E DOM Rudolph daughter, Lana Rae came to David Tait's Virginia based herd via another cow bearing the Scientific prefix, Scientific Liza Rae EX, by Townson Lindy.

After claiming Honorable Mention All-American Four-Year-Old in 2005, Liberty Rae was sold for \$410,000 in the 2008 Cowtown Sale. She went on to win first aged cow, best udder, senior and grand champion at the 2009 Vermont State Show and has already achieved Star Brood status. Despite selling this herd star, a large proportion of the Gloryland herd is still made up from this impressive, alternative line of Roxy's, which is still attracting many admirers.

Today, this line continues beyond Liberty Rae to her VG-89 Goldwyn daughter, Libertyraes Goldielocks-ET owned by Gillette Farms and another VG Goldwyn daughter being developed at Morsan Farms.

## Bob Miller (Mil-R-Mor Holsteins)

"One interesting statistic of Roxy is that she is the only cow in the breed that I am aware of that has founded a four generation line of females that have produced over 11 Excellent offspring each and in four different countries. In the US you have Roxy with 16 Excellent daughters her daughter in Canada is Roxette with 17 Excellent daughters and in turn her daughter in England is Bond Haven Dixie Rox with 11 Excellent daughters and in Ireland you have Dixie Rox's daughter, Joylan Blackstar Roxie with 12 Excellent daughters."

"I always say that type brought her fame, but production was her game. Production in the family has been as exceptional. I think the highest production record in the family is around 66,000 lbs. of milk several in the 50,000 lb. level and many in the 40,000 lb. mark. At one time we took a picture in the pasture of seven Roxys that were Excellent with Excellent mammary systems and they averaged 43,000 lbs. of milk with over 1700 lbs. of fat."

"No matter how far out from the old Roxy you go the imprint of her tremendous type still comes through. Here at Mil-R-Mor we have had seven Excellent-94 point Roxy's. There are now around 300 Excellent descendants of Roxy that trace back in an unbroken direct Excellent line to Roxy."

## Brigeen-C Integrit Robin EX-95

One of the highest scoring Integrity daughters worldwide, Brigeen-C Integrit Robin was bred from Haselmer Prelude Rhoda EX-91 3E. Rhoda descends from Brigeen Southwind Rhonda VG-88 2\* via Mil-R-Mor SWD Rockette VG-86 who in turn is out of Mil-R-Mor Toprox 3E-94 the highest classified and production daughter of Roxy. This alternative sire stack obviously appealed to AI studs and Robin was used as a successful bull dam with Emory son, Brigeen Riley used extensively around the world in the early 2000's and her two Durham sons, Dirigo-Conant Reeves and the German bred Duty marketed more recently. Duty received his first crop proof in 2010, and with impressive type figures, he will be another sire to watch for in the show rings.

Perhaps her best descendents to date have been her Emory daughter Brigeen Emory Raisa EX-92 who bred the EX-95 2E Convincer Rhonda, securing the future of the 'Rhonda' line with progeny across the globe. Convincer Rhonda is also the highest production Roxy in the world with a top record of 4-10 2x 365d 66,420M 4.3% 2839F 2.9% 1943P. One of the highest top heifers from this branch of the family is Goldwyn Rhonda 1 from G. Pakkert (NL). She is the #20 GTPI Goldwyn and Top 25 PTAT heifer in Europe (GTPI +2034 / PTAT +3.59) She is out of the fantastic Loford Shottle Rhonda VG-89-UK!

## Giessen Cinderella VG-89-NLD

For the people who have followed the past year's Top Genomic lists; the name of Cinderella should ring a bell. Bringing the family bang up-to-date, the foundation of this Dutch branch can be identified as Giessen Cinderella VG-89-USA, also sired by Regancrest Elton Durham and going back two generations via Wilcoxview Cinderella EX-92 2E. She was sired by Marcrest Encore and her dam was Scientific Cinderella VG-88, sired by Mr. Mark Cinder and again back to the great Hanoverhill Tony Rae EX-96-USA 3E GMD DOM (another daughter of Roxette) who is also the grand dam of the before mentioned Debutante Rae.

Durham Cinderella has done a great job in the Giessen herd with many fantastic descendents already. It's her Shottle daughter, Giessen Cinderella 15 VG-89; however, who has attracted a serious amount of international interest recently. At the National HHH-Show in 2009, she won the Reserve Intermediate Championship and shortly after that, she put the Cinderella name on the map with sky-high Genomic indexes identified. Cinderella 15 still has a US 12/10 GTPI +1900 and PTAT +3.39 score which keeps her in the PTAT top ranking Shottle daughters in Europe. The way she transmits is even more impressive with the most well known, her two daughters by Sandy-Valley Bolton; Giessen Cinderella 20 VG-87 89-MS at 2Y and her full sister Cinderella 22 VG-85-2YR. The first mentioned, Cinderella 20 VG-87-2YR, now owned by Diamond Genetics and JK Eder Holsteins, and is still the #1 PTAT cow in Europe with US 12/10 PTAT +4.00 and completing the total package with GTPI +2054. A popular donor dam, embryos from her have been exported already to breeders and AI stations all around the world. Cinderella 20's own Goldwyn daughter seems to continue this line with a PTAT of +4.24 which makes her the #2 PTAT heifer in Europe and #16 worldwide!

Full sister Giessen Cinderella 22 VG-2YR, who is still owned by her breeder Giessen Holsteins, is the world's #7 GTPI Bolton daughter with GTPI +2145!

Giessen Cinderella 17 EX-90 is a Goldwyn x Durham Cinderella cross and is one of the very best Goldwyn daughters in the Netherlands. Her son De Rith AltaShare GTPI and MOM daughter De Rith Simone are her progeny that perform well in the Genomic rankings with GTPI's of +2058 and +2188 (PTAT +1.68) respectively.

A great source for the R&W breed is Giessen Cinderella 29 VG-86 89-MS at 2Y, owned by Diamond Genetics and Nobsch Holsteins. This \*RC Cinderella is among the top global Genomic scores for Red or \*RC with US 12/10 GTPI +1730 and PTAT +2.26, she increased no

## The Nunes family (Scientific Holsteins)

**Scientific Holsteins got their start in the Roxy family when Matt fell in love with Roxy herself.**

"Roxy was the complete package – type, production, high components and longevity." After following the family, Matt purchased her great-granddaughter Hanoverhill Tony Rae as a yearling heifer in 1987. This complete package reputation has held true for the many generations at Scientific Holsteins as they try to breed for the next great cow.

"High components have transmitted well in the Roxy family and now with more management traits in the index formula we just happened to start having individuals come up high on some of the lists. We were always striving to breed good cows with the complete package and naturally their genetics found their way on the top lists."

"All in all we are just trying to breed really good cows that will make us money as dairy farmers and Debutante Rae and her offspring have helped us achieve this and provide a little fun along the way."

less than 354 GTPI, +1.43 PTAT and 194 points for Net Merit in her Genomic test! She has a great alternative bloodline for Red & White breeding programs with, in succession, Mr. Burns, Laudan and Durham and she is among the highest producing two-year-olds in her herd ever, with a projected first lactation of: 2-04 305d 10.61kgM 4.03%F 3.62%P LV 134.

**A truly global phenomenon now with well over 300 Excellent scored descendents: Glenridge Citation Roxy has touched every corner of the Holstein world, bringing style, power and longevity to the breed – a real cowman's favorite with show style to boot. Long Live the Queen!**

We hope you enjoyed this Roxy feature and understand that with over 300 Excellent descendents scattered across many lines it was impossible to include all the great Roxys. However, we do want to hear about your Roxy and the impact this great bloodlines has had on your herd. To follow up this feature we will be highlighting some of your Roxy stories on Holstein Plaza. Please use the contact us link at [www.holsteinplaza.com](http://www.holsteinplaza.com) or [www.eurogenes.com](http://www.eurogenes.com) to share your Roxy story.

**Giessen Cinderella 20 VG-87 2yr.**  
+4.0 for PTAT! #1 PTAT cow in Europe and #5 World Wide!!

**Scientific Gold Dish Rae TV RC VG-88 2yr.**  
The only TV and RC Goldwyn dtr of Debutante Rae. Dish Rae is the #9 GTPI cow for the R&W breed

**Giessen Cinderella 17 EX-90**  
High Genomics & Excellent Show Type

# Online Elite Bull Sale - March the 28th till April the 1st

## Online Bull Sales... We are just at the beginning!

In November 2010, the team of Diamond Genetics and Eurogenes launched the first online AI Bull sale. The results were satisfying; top prices were good, the sale was very well supported and the response from the market was positive. Due to NAAAB rules and a learning process however, we have had to modify a couple of small aspects to the bull sale since we last described it in Hotspots. This is why we are republishing a small summary describing how the sale works and what the conditions are for the genomic testing of bulls included in the sale.

### 1. The packages

Each package contains of a number of bulls. A first choice bull from each package is being sold. The price bid is for one bull only. After receiving genomic results and taking the first choice the buyer has the right to buy the other bulls (except for the second choice from the package) for 50% of the price paid for the first choice.

### 2. The 5 minute rule

In a typical auction setting, there is always a final verbal countdown that occurs to allow buyers time to decide to place higher bids. This 'final call' is reset each time someone places a bid. "Going Once, Going Twice, Going Three times" - someone places a bid - "Going Once, Going twice" - another bid placed - "Going once, going twice".. and on and on until the auctioneer completes the entire phrase "Going Once, Going Twice, Going Three times, SOLD to the highest bidder". This rule is no different, but because of the delay caused by the internet and other possible technological speed bumps, we have a 5 minute final call time. If there is bidding activity on the auction within five minutes of the scheduled closing time, the auction automatically switches into a special mode analogous to the 'going, going, gone' period of a live auction. In this mode, the auction is automatically extended until there have been no bids placed within five minutes. When five minutes have passed with no bidding activity, the auction closes.

The 5 minute rule makes auctions unbiased by allowing all bidders an equal opportunity to place their best bid. In other online auctions where an auction ends exactly at a given time, some bidders will hold their bids until the last minute or so, in the hope of winning an item on the cheap. This is referred to as 'sniping'. The 5 minute rule gives all bidders an equal opportunity to place their best bid on an item before the item closes. This way, no bidder loses an item to sniping, and the seller can be assured that he has achieved the maximum value for the item. Our auctions are more like a live auction where bidding continues until no one wishes to place another bid. The auctioneer does the 'going once, going twice' routine, and if someone places a bid the bidding resumes.

Since all people bidding on an auction are connected by the Internet which can be slow and cranky at times, we picked 5 minutes as a reasonable amount of time to overcome any slow connection issues.

In a 'live' auction, the person who is willing to pay the most wins the item. Why should it be different on the Web?

The sale lots sell in sale order. As soon as the first one is sold, the second one will start. This is similar to a live auction.

### 3. The Proxy-bid

The sale works using a Proxy Bid system. Several websites such as E-bay work like this. A proxy bid means a bidder tells the computer the maximum amount he is willing to bid for the first choice bull. The computer then automatically places a bid on the bidder's behalf. The computer continues to bid on the bidder's behalf, whenever he is outbid by another party, until the maximum is exceeded or the auction is won. Nobody, including the sale organization, has or will ever get access to the placed proxy bids. Bidders should keep in mind that the computer automatically performs proxy bidding on behalf of every bidder in the auction. The net effect of this technology is to remove the need for bidders to actually monitor auctions in real time in order to win them at fair market prices.

### 4. Genomic testing

The buyer has the option to make his choice based on genomics. The buyer will receive DNA material from each bull in the package with which to carry out the genomic testing. In case the buyer does not have the ability to do genomic testing, the sale organization can do the genomic testing through Sexing Technologies/TWG. The price of genomic testing through the sale organization is €250,-/sample. In case and only if the genomic testing is being done through the sale organization, the marketing rights of the first choice bull within the United States of America go to Sexing Technologies/TWG. This is due to the NAAAB resolution regarding access to USDA genomic predicted transmitting ability, article 5. The buyer who wants to make use of genomic testing through the sale organization and intends to market the semen of the bulls in the United States should contact Sexing Technologies/TWG to discuss the details. For parties who can do genomic testing themselves or parties who are not interested selling into the United States, this is not relevant.

Package	Buyer	Price

## Sons from the World's greatest cows selling

Broeks Betty VG-88 2yr.  
1st Choice JORDAN sells

R-Z Baxter Caramal VG-89-CAN 2yr.  
2 SANCHEZ sons are in the sale

Fustead Oman Sammy VG-USA  
Her Bowser dtr has > 2400 GTP1

Golden-Oaks Perk Rae Red PL EX  
Her Homozygonous PL sons sells

## Package A "Homozygonous PL!"

### BULLS

- #1 HOMZOYOUS POLLED & RED MITEY P x Golden-Oaks Perk Rae EX-90-USA x
- #1 MAN-O-MAN x KNS Romanik VG-85-DE 2yr.
- #4 SUPERSTITION x KNS Romanik VG-85-DE 2yr x Jocko Radieuse
- #1 XACOBEO x Veneriete Shottle Ida VG-86 2yr. x Ida O VG-86 2yr.

### Details

- UNIQUE chance to buy a Genomic tested Homozygounus R&W POLLED bull (withouth Lawn Boy in the pedigree!!!!)
- KNS Romanik VG-DE 2yr. is out of one of the World's very best Jocko Besne dtrs RADIEUSE!!
- Veneriete Shottle Ida 6 VG-86 2yr. is the World's #6 GTPI Shottle dtr
- Ida 6 her dam is the World's #7 GTPI Oman dtr!

**Golden-Oaks Perk Rae PL EX-90**  
Fantastic source for PL R&W, Roxy's!

**Radieuse EX-91-DE**  
One of the very best Jocko dtrs!

## Package B "Amazing Gestra"

### BULLS

- #3 MAN-O-MAN x DT Gestra VG-86-DE 2yr.
- #3 SUPERSTITION x DT Gestra VG-86-DE 2yr. x Genua VG-87 2yr. x Grietje 80 EX-91 (s. Esquimau) x VG-89 Lucky Leo

### Details

- DT Gestra is the maternal sister to the proven sires DT Impress & DT Improver which is a Top 10 bull in the catalogue for CRV
- DT Gestra VG-86-DE 2yr. is one of the most popular bull dams of her Generation
- DT Gestra was a Top 5 cow of the 2007 / 2008 group in the independent NOG Test herd in Germany
- DT Gestra is a former Top 25 GTPI cow in Europe
- Next dam is the extremely popular Genua VG-87 2yr.
- Grand dam Grietje 80 EX-91 is dam to the proven sires Emil II, Tucano, Homerun, Herzbube, Jorrik & more

**DT Gestra VG-86-DE 2yr.**  
Top 5 cow in NOG test herd

**DT Improver**  
Top 10 bull in CRV sire catalogue!

## Package C "The best of the Z"

### BULLS

- #8 bulls Alta ROSS x Aceroft Goldwyn Lila Z VG-87-UK 2yr. x Lylehaven Lila Z EX-94-CAN

### Details

- Great opportunity to get the World's highest Lila Z Bull
- First Choice out of 8 Alta ROSS Bulls (All Ross bulls from Lila Z)
- Aceroft Goldwyn Lila Z is one of the very best transmitting family Lila Z's
- GW Lila Z is the dam of Willsbro LARSON RC @ Semex RC! One of the most popular sire of sons for the R&W Breed!
- Willsbro Larson RC is the #1 DGV LPI bull for R&W and having skyhigh GTPI & PTAT number as well
- GW Lila Z has 4 dtrs scoring over +2100 GTPI
- GW Lila Z is the full sister to Lilac, Lava, Lyndsey & more

**Aceroft Goldwyn Lila Z VG-87 2yr.**  
Goldwyn x Lila Z

**Willsbro Larson RC at Semex**  
#1 RC LPI bull. Brother to Package C

## Package D "Index & Type"

### PREGNANCIES

- #7 SNOWMAN x Giessen Cinderella 20 VG-87 2yr.
- #3 ATWOOD x Giessen Cinderella 20 VG-87 2yr.
- #4 Implants - OBSERVER x Giessen Cinderella 20 VG-87 2yr. x Shottle x Durham x Encore x Highlight x Hannoverhill Tony Rae EX-96

### Details

- Cinderella 20 is Europe's #1 and the World's #5 PTAT cow +4.00 PTAT
- Index Cinderella 20: US 12/10 GTPI +2054 / PTAT +4.00
- Very close related to Scientific Debutante Rae EX-92-USA, dam to Destry, Deuce, Dusk, Demello and more
- Great combinations made with bulls like Snowman, Observer & Atwood!
- Opportunity to make the World's new

**Giessen Cinderella 20 VG-87 2yr.**  
#1 PTAT Cow Europe / #5 in the breed

**Scientific Debutante Rae EX-92**  
Close related family member

## Package F "Snow White Betty"

### PREGANCIES

- #4 JORDAN x Broeks Betty VG-88 2yr. - Confirmed pregnancies
- #1 JORDAN x Broeks Betty VG-88 2yr. - Implant

### Details

- Broeks Betty VG-88 2yr. is the only milking Snowman dtr with top pedigree, top index, top family and show style
- Broeks Betty is one of the most popular cows on earth
- Broeks Betty sold for a huge amount of money to a North-American syndicate
- This is the first and might be the only opportunity to own a bull out of this fantastic cow
- Broeks Betty is the #8 GTPI cow in Europe
- US 12/10 GTPI +2156 / PTAT +3.11
- CA 12/10 GLPI +2952 / Conf. +14

Broeks Betty VG-88 VG-89-MS 2yr. Broeks Shoal VG-88 2yr.  
One of the HOTTEST cows in the breed 5th Generation bull dam

## Package G "Rita & FREDDIE"

### BULLS

- #2 GARRET x Willemshoeve Rita 0246 VG-86 2yr. x Rita 275
- #1 GERARD x Willemshoeve Rita 0246 VG-86 2yr. x Rita 275
- #1 FREDDIE x Juniper Goldwyn Whisper VG-87-USA 2yr.

### Details

- Rita 246 VG-86 VG-89-MS 2yr. is a Goldwyn x Jesther x Marconi
- Grand dam is the sister to proven sires Ramstrong, Restha, R Applause, Rannek and many more
- FREDDIE is the #1 TPI bull in the breed and not available in Europe
- Juniper Goldwyn Whisper is out of EX-95 Outside x EX-94 Formation x EX-94 Benchmark x EX-90 x EX-90 x EX-90
- Grand dam is full sister to proven sire Wizard
- Fantastic and exclusive combination

Willemshoeve Rita 246 VG-86 2yr. Juniper Goldwyn Whisper VG-87 2yr.  
Lovely cow from the RITA'S!! Out of 6 Generations EXCELLENT

## Package H "New GISA"

### BULLS

- #2 SUPERSTITION x Anderstrup Roumare Gisa NC
  - #4 NIAGRA x Anderstrup Roumare Gisa NC x
- Anderstrup Oman Gisa VG-88 2yr. x Genua VG-87 2yr. x Grietje 80 EX-91

### Details

- Anderstrup Roumare Gisa is the former #1 GTPI Roumare in the World and still having GTPI +1982
- Anderstrup Roumare Gisa is just fresh and looks very promising, expecting for high VG 2yr. Old score
- Her dam is one of the very best Oman dtrs in Europe, Anderstrup Oman Gisa VG-88-DK 2yr.
- Her dam is the full sister to DT Improver, the #8 bull in the CRV Sire Cat.
- Grand dam Genua is an extremely popular brood cow
- 3rd dam Grietje 80 EX-91 is dam to many proven sires

Anderstrup Oman Gisa VG-88 2yr. DT Improver @ CRV  
One of the very best dtrs of Oman #8 bull in the CRV Sire Catalogue

## Package I "#1 TYPE & BARBIE"

### BULLS

- #3 ATWOOD x Farnear-TBR Bailey VG-87-USA 2yr. x EX Champion
- x Regancrest Durham Bliss VG-89-USA 2yr.

### Details

- Bulls are full brothers to Bailey 622, Europe's #1 & The World's #11 PTAT Heifer (US 12/10 PTAT +4.32)
- Same sire stack / Same family as Regancrest S Chassity EX-92-USA, dam to the very popular Genomic Young Sire Mr. Chassity Gold Chip (GTPI +2256 / GLPI +2860)
- Grand dam is the full sister to Regancrest-PR Barbie EX-92-USA
- Same family as Baltimor, Braxton, Gold Chip, Big Time, Boxer & more

Regancrest S Chassity EX-92-USA Farnear-TBR Bailey VG-87-USA 2yr.  
Very close related to Bailey Dam to these bulls

## Package J "4 STAR families"

### BULLS

- #1 FREDDIE x Farnear-TBR Bailey VG-87-USA 2yr.
- #1 GARRET x Muranda Mac Lucky VG-87-USA 2yr.
- #1 PLANET x Gillette Zenith 2nd Star VG-88-CAN 4yr. x 2nd Wind
- #1 FREDDIE x B-A-M Mac Banjo NC x Regancrest Brasilia VG-88

### Details

- Muranda Mac Lucky VG-87-USA 2yr. belongs to the very best Mac dtrs in the USA! Straight out of the Muranda L Lily EX-95-USA family
- Planet x the VG-88-CAN Zenith sister to WINDBROOK! #3 Bull Canada
- Freddie (not available in Europe) x Mac x Brasilia VG-88 2yr., sold for \$ 1.500.000 and full sister to BRAXTON & BALTIMOR!!
- Bailey is dam to Europe's #1 PTAT heifer and makes a great complete cross with the #1 TPI Freddie, which is not available in Europe!!

Regancrest Brasilia VG-88 2yr.  
Sold for \$ 1.500.000

Gillette Windbrook @ Semex  
Mat. brother to 2nd Star VG-88 2yr.

## Package K "Carmel's best"

### BULLS

- #2 SANCHEZ x R-Z Baxter Carmel VG-89-USA 2yr. x Carmel
- #1 ASHLAR x Ralma Goldwyn Carmel VG-89-USA 2yr. x Ralma Christmas Cookie VG-89-USA 2yr. x Durham x Juror Faith EX-91-USA

### Details

- R-Z Baxter Carmel VG-89-CAN 2yr. sold for \$ 100.000
- Carmel is the #4 GTPI Baxter dtr in the Breed (GTPI +2067)
- Ralma Goldwyn Carmel VG-89-USA 2yr. is the full sister to Ralma Goldwyn Crown @ Select Sires (US 12/10 TPI +2012 / PTAT +2.04)
- Grand dam Cookie is the full sister to Cricet @ CRV
- This package offers the very best of the Carmel branch of the Ralma Juror Faith cow family!!

R-Z Baxter Carmel VG-89-CAN 2yr. Ralma Goldwyn Carmel VG-89-USA  
The #3 Baxter in the Breed!! Full sister to Gold Crown

## Package L "Atlee's Best"

### BULLS

- #1 MAN-O-MAN x Heavenly Golden Atlee NC
- #1 ALEXANDER x Heavenly Golden Atlee NC
- #1 SANCHEZ x Heavenly Golden Atlee NC  
MD-Delight Durham Atlee EX-92-USA

### Details

- Heavenly Golden Atlee NC is fresh and looks very promising
- Golden Atlee is the full sister to the former #1 & current #5 PTAT bull in the breed, Maple-Downs-I G W Atwood, PTAT +4.23
- Golden Atlee is the maternal sister to Aftershock, #5 PTAT Shottle son in the Breed (US 12/10 PTAT +3.63)
- Golden Atlee is the full sister to famous cows like Ariel (sold for \$ 1.500.000), Abbigail, Albany (dam to skyhigh Genomic dtrs) and more!
- Goes back to MS Kingstead Chief Adeen EX-94, Alicia's EX-97 full sister

Heavenly Golden Atlee NC  
Full sister to ATWOOD

MD-Delight Durham Atlee EX-92  
One of the HOTTEST cows right now

## Package M "Proven brood power"

### BULLS

- #6 BOWSER x Fustead Oman Sammy VG-USA 2yr. GMD DOM x VG-86 2yr. Blitz (Full sister to Socrates) x Saturday family
- #2 SUPERSTITION x Grüpa-Hof Goldwyn Shadow VG-87-DE 2yr. Shottle x HF Gina VG-89-DE x Gourmette EX-92-FR x EX-94

### Details

- Full sister to this bulls, Fustead Bowser Swan is the World's #1 GTPI Bowser dtr, and #8 Genomic female in the World. GTPI +2402!!
- Other Genomic numbers of offspring Sammy: GTPI +2402 (Bowser), GTPI +2167 (Million), GTPI +2125 (Niagra), GTPI +2137 (Niagra), +2164 (Ramos) & more!!
- Oman Sammy still has over 2000 GTPI
- Same family as Mr. Sam, Socrates, Steady and more!
- Shadow is out of the great French Gourmette cow family
- 2 Superstition sister to Shado are scoring GTPI +2137 & +2122

Fustead Oman Sammy VG-USA 2yr.  
Her Bowser dtr has GTPI >2400!!

Ready for application on a large-scale?

# → Genomic Proof

Since the world wide introduction of genomic proofs, there has been a lot of enthusiasm for the new data, but also a lot of opposition. Some AI Companies are making use of young genomic bulls as sire of sons, while others do not even consider this approach. To get an insight into the reliability of genomic proofs, an objective method is needed.

## Genomic Proofs vs Progeny Proofs

In this article we compare the genomic proofs of proven sires before they received progeny information in their proofs, with their realized proof, which includes daughter information. To prevent “comparing apples with oranges”, the breeding scale should be the same as that used for the actual proof. Furthermore, it is important that the method of estimating genomic proofs should be comparable with the current method. For example, the first genomic proofs were officially published by the USDA in January 2009. Between January 2009 and April 2010 the method was improved with better scaling options and an enlarged reference population. Assumed is that the scale of the current genomic proofs is more comparable with the scale of proofs of actual progeny tested bulls.

The data that we selected for our research is the top 10 GTPI of bulls in December 2010, that received their first progeny proof in August 2010. For comparison, we make use of the genomic proofs of these bulls in April 2010, when no daughter information was yet included. The results are shown in Table 1, and the difference is the GEBV of December 2010 minus the GPA of April 2010.

## Remarkable Result

Only two of the ten bulls out of the published top 10 have a total difference in GTPI of more than 100 points. However, it is even better to look individually at the range for different traits. In general, the production traits were somewhat overestimated. Studying the other traits, there are less differences and small increases and decreases have always been usual tendencies in individual trait scores for first-crop bulls.

## Selection of Mating Sires

The benefit of using young genomic bulls should be a combination of the effect of more early information at an acceptable lower reliability. In addition, the semen price will have an important role in making this decision from a business economics point of view. For backgrounds for the decision making process, the top 10 (G)NM\$ is selected from three categories of sires from the active USDA sire list. The categories and the averages are shown in Table 2. Note that not all second-crop sires have semen available anymore, so in this analysis, only available and active bulls were considered.

With the given average reliability and the genetic standard deviation of the Net Merit Index (198 GNM\$), a confidence range can be calculated. For the three categories of sires, the curves of confidence ranges are shown in Graph 1.

The top of each of the curves is the average of the category. Logically, for each category, the estimated GNM\$ has the highest probability of being the true GNM\$. However, for bulls with higher reliabilities, the probability is higher than for bulls with lower reliabilities. Between the left vertical line and the right vertical line aside the average, the

## Example of type details

To get an indication of how accurate genomic sires can be mated, we compared the type details of the two proof runs of Willems-Hoeve AltaRush. With 67 classified daughters included in his type proof, this bull has the largest current progeny group of the analyzed top 10. His type details from April 2010 and December 2010 are shown below. Of the 17 analyzed traits, only 2 have a difference of more than one point.

Type details		
USDA Genomic Evaluation April 2010 (No progeny information included)		
Stature	+2.00	F&L Score +1.96
Strength	+0.77	FU Att. +3.15
Body Depth	+0.47	RU Height +2.76

probability is 67% that the true proof is within this range of the estimated average proof. The probability is 95% that the true proof, is within the range between the second left vertical line and the second right vertical line away from the estimated average proof. For example, the highest active USDA sires on Net Merit is Ladys-Manor Pl Shamrock. His proof is 869 GNM\$ with 69% reliability. This means that there is a probability of 67% that his real proof will be between 759 GNM\$ and 979 GNM\$. The probability is 95% that his proof will be between 649 GNM\$ and 1089 GNM\$.

## In conclusion

Given the relative low price and rising reliabilities of genomic proofs, young genomic sires are becoming more and more interesting as potential mating sires. The difference in reliabilities between young genomic bulls and early 1st crop progeny tested bull is becoming smaller and smaller over time, so young genomic bulls are no longer comparable to young bulls with no genomic proof and only a parent average. However, the individual bull's level of index should always be considered. Therefore, a combination of the elite young genomic sires and elite progeny proven sires is recommended.

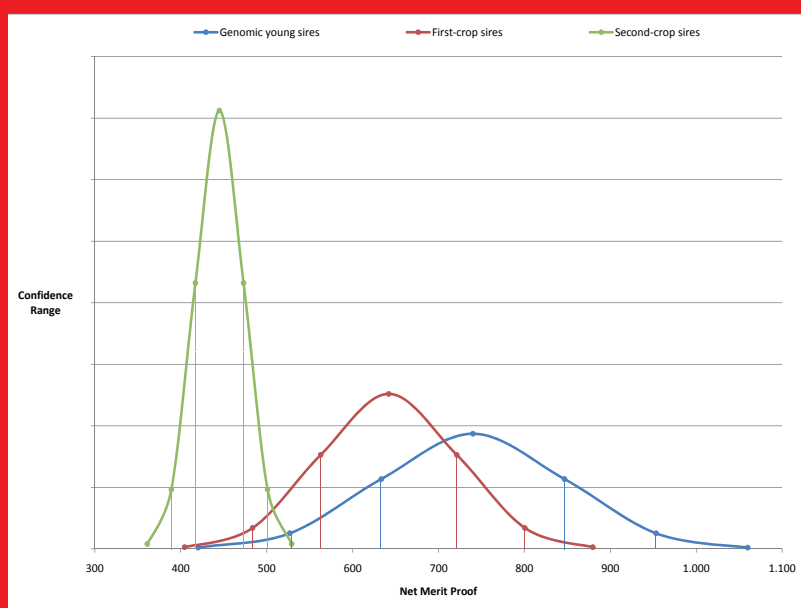

Table 2. Top 10 (G)NM\$ Active USDA Sires of three different categories.

Line in graph	Category	Average reliability	Average GNM\$	Average Price per unit in USA (Dec '10)
Blue line	Genomic young sires	71%	740	US\$ 25
Red line	First-crop sires	84%	642	US\$ 47
Green line	Second-crop sires	98%	445	US\$ 37

## Excellent example

In the first official genomic publication in the USA of January 2009, Badger-Bluff Fanny Freddie was the #1 Young genomic bull on GNM\$. Since his first progeny proof in April 2009, Freddie has been at the top of the GNM\$ list of progeny tested bulls and has been a very popular sire of sons.

**Current Index Freddie**  
US 12/10 TPI +2222 / NM \$ 755  
#1 TPI Bull based on dtr information

# SHOW

# Genomic Testing

In co-operation with Holstein Association USA, Eurogenes offers Holstein breeders the opportunity to have females genomically tested.

Complete the form below and perhaps we will see your animal back in the next Hotspots Top GTPI lists!

You can also register through the Registration forms on Eurogenes.

Watch for the upcoming deadlines and more information on [www.eurogenes.com](http://www.eurogenes.com)

## Registration

Hereby I register the following animal(s) listed below for the Genomic Marker test by the USDA

Name	Reg. #	D.O.B.	Sire	Dam

### Choose the way of Genomic testing

- ☐ 3K Genomic test US \$ 55
- ☐ 50K Genomic test US \$ 160
- ☐ 800K (HD) Genomic test US \$ 365

**Additional costs will be € 70 per animal for registration, administration & postage costs**

Breeder	_____

## Pontiac, Illinois

Interglobe Genetics is one of the nation's most well respected bovine semen collection centers. Located in Pontiac, Illinois, we are committed to providing the most dependable, professional service in the industry.

Your animal's health, reproductive performance, and care are our primary goals. Our facilities are design to accommodate the housing and collection of bulls for both domestic and international owners. Our services also include the storage and shipping of semen internationally or within the U.S. Visit our web site for more detailed information, or send us an email. We have programs to fit everyone's genetic goals.

### International collection barn

The international and CSS barns house bulls for collection to various countries including the European Community, Australia, Canada, Mexico, and New Zealand.

### Domestic collection barn

This is our main barn for housing and collection of semen for domestic use. Many of the stalls have the convenience of an outside run, for the bulls comfort.

### Office, lab and semen storage

The Interglobe business office, laboratory and semen storage are housed in this facility. The Interglobe staff provides dependable, professional service to customers by offering semen storage, shipping, AI supplies, and more.

### Round barn with sign

Built in 1918 the round barn at Interglobe Genetics has become a symbol of the business. This barn is on the list of National Historic Sites and is one of the few barns of its kind left in the country.

# → Bull Dams & Show Success

The Roza's from the IJsselvliedt herd have captured the attention of both type enthusiasts and sire analysts for a long period of time. Carefully developed by the Puttenstein family it has successfully spread out to different herds. Join us in discovering how a deep Dutch cow family has been able to compete with the best in Europe.

### The IJsselvliedt herd

The Roza family can be traced back to 1948 in the Dutch Herdbook. Egberts Puttenstein's father Gerrit Jan, purchased Roza 7 as a well bred heifer in the autumn of 1960 from the Hemmink family in the Almelo region. The Roza's really got started when Egbert and wife Henny bred a big, powerful VG-87 Ned Boy to a new star, just released by Holland Genetics at the time with this fast name of Etazon Laudia Lexus. Egbert recognized after inspection of his first daughter group however, that he needed to watch strength and width and saw him as a perfect mate for his Ned Boy Roza 78, already the 7-th generation Roza in the IJsselvliedt herd, not far from Zwolle and the river IJssel.

### Johan Schep

"We wanted a family which could milk, breed and show. The Roza's have done all of this for us"

### Roza 105 EX-92

Over the years the Roza's excelled in high lifetime yields. Both the original Roza 7, her daughters and granddaughters and even on to this daughter of Lexus, Roza 105 EX-92, they often still produced at the age of 10 to 14 years. They were not just taller and wider than average, they also excelled in the udder and especially in the feet and leg department. Foundation cow Roza 105 EX-92 captured the Reserve Junior Championship in 1996 at a large show in Holland and her daughters and granddaughters have also done really well. Both Roza 105 EX-92 and daughter Roza 137 EX-92 by Lucky Leo participated at the European Show in 2000 in Brussels. Four years later Roza 137 and an EX-90 Convincer granddaughter

### The Roza's and the Schep family

When Egbert and Hennie Puttenstein decided to stop milking and breeding, the Schep and Puttenstein family made a quick and good deal. To honor the work of the Puttensteins and the Roza's, Jan Schep published a booklet about the origin and achievements of the Roza's. Right now and amongst over 800 milking herd mates in several Schep herds, the Roza's are as dominant as in the Puttenstein barn of around 50 milkers. Son Johan Schep says: "We wanted to improve our herds with a family of which we knew they could milk, breed and show. We only work with them for 4 yrs and we can already say that the Roza's have done all this for us too".

from the Lexus made it to Brussels again. Quite an achievement!

### Amazing production

The Roza's were more than just show cows. Roza 137 EX-92 by Lucky Leo made a first lactation of over 13.000 kgM with 3,96% fat and 3,35% protein in just 305 days. She was a tall, wide, open ribbed and dairy young cow, a true eye catcher and both breeders and sire analysts wanted to work with such a great first calver. Roza 137 classified EX-92 in her second lactation and made over 100 embryos in her life. Looking back it is Roza 137 EX-92 that is now heading the production branch of the family. Other daughters of the Lexus, Roza 105 EX-92 have been a little less abundant in yield perhaps but kept the typical Roza qualities alive. They are now spread out across at least 8 top herds in The Netherlands alone as of today. Also outside Holland the Roza's are up and coming!

### Roza 137 and Jocko Besne

Roza 137 EX-92 was bred to all kinds of bulls in the second half of the nineties. Looking back, her flushes to Jocko Besne and Bullcrest Patron Sabre probably have been most successful. Jocko at the time was a new sire of sons and the mating produced some outstanding results. Not the size and scale of the Lucky Leo, however production, fat-protein ratio and good feet and legs were there. The Jocko sons that made it are Joke, Jobak and AltaJulius. A fantastic achievement. From these Jocko sons, Julius now has 2900 daughters in his proof and Joke close to 1500. Joke, tested by the VOST in Leer, Germany still ranks well at 129 RZG. Jobak is now 126 RZG. Nearly all full brothers

**Rieten Roumare Roza VG-87 2yr.**  
Outcross & High Genomics. Embryos exported to different countries, including the USA

**Laudan Roza 9496 VG-86 2yr.**

dtr in Europe! Roumare x Ramos

transmit high production, good protein% and good feet & legs. Full sisters have been influential too. Roza 158 VG-88 has done well especially and will learn more about her branch later on. The Lexus Roza 102 has a well proven son at KI Samen and also by Lucky Leo: IJsselvielt 140 is now at over 1700 daughters.

## Not just the Lucky Leo

It may seem as if this Roza 137 is the key cow in the family. However, her maternal sisters have been influential too. The VG-88 Labelle daughter of Roza 105 EX-92 had a son by Etazon Trinity (an Ambrose brother to Patron) that turned out to be the very first proven sire from the family in 2004. IJsselvielt Breakout, the only son of Trinity ever to receive a proof, is still ranking very well in Holland, the UK, Ireland and Germany and has over 23,000 daughters in more than 10 countries. In the UK he is now one of the highest 99% rel. PLI bulls in the rankings. The VG-88 Labelle also had a great Convincer daughter that classified VG-88 as a first calver and EX-90 as a second calver. This Roza 150 in her turn had a fantastic Champion daughter, Roza 7013

**Gert v.d. Langemheen**  
"The Roza family is the best family  
we work with"

VG-87 2yr. Roza 7013 made it to the European Show in Oldenburg in 2006 too, after being a Reserve Junior Champion on the HHH Show and the CRV Show in 2005. At the same CRV Show, another daughter of the Lexus became the Junior Champion: Roza 189 VG-89 by the relatively unknown sire Derby (s: Design). Today, Champion Roza 7013 is proving herself as a fantastic brood cow in the herds of Mr. Schep, Holland. She is still milking and is making 13,373kgM 4,38%f and 3,27%p at 6.08 yrs in her 3rd lactation. Her best daughters are by Goldwyn, Shottle, Toystory, Zesty and Mascol. Her Shottle classified VG-89 as a 2yr old and a Toystory scored VG-88 whilst projected to 12,000kgM with 3,3%p in 305d, 2nd lactation.

## Outcross

If you evaluate the current bull mothers from the Roza's you will find that the sires in the pedigrees are often a little different. We mentioned this flush to Bullcrest Patron Sabre on the Lucky Leo Roza 137. From the 5 embryos Gert van de Langemheen purchased, 3 heifer calves were born and all 3 achieved the bull mother status. "For improving our Blarinckhorst herd this was a fantastic start and today the Roza family is the best family we work with" as Gert says. Two of the Sabre daughters were flushed to Ramos and this aAa mating produced

a very popular bull mother and two well proven sons, marketed in Holland and abroad: Blarinckhorst Franchise and Romeo. The Ramos from this mating, Rosalie 2 VG-86, is a dairy high yielding Ramos that unfortunately never flushed well and carried CVM. Her TV sons tested well however and her Oman daughter is the nr. 50 G TPI cow in Europe. A mating to Roumare on the Ramos Rosalie worked too. Alta expects great things from Blarinckhorst AltaRoy. One full sister is VG-86 in Denmark, purchased by Anderstrup Holsteins via the Holland Masters Sale 2008. The other is VG-86 in the Blarinckhorst herd and both already have sons that tested well. If you have a high yielding VG-86 Roumare from a VG-86 Ramos from a VG-87 Sabre from an EX-92 Lucky Leo you certainly have a different sire stack to offer.

## Champions

Roza 7040 at Ascol, Spain

Readers of this article will have noticed that Calbrett-I HH Champion has worked real well on the Roza's. The Champion from the Convincer from the Labelle, Roza 7013 VG-87, made it to the European Show for Holland. The Champion from the EX-92 Lucky Leo, Roza 7014 EX-90, is a true eye catcher and also De Beeze Holsteins had success with this mating. Carlos Mendez from AI Ascol in Spain thinks the Roza's are special: "We have inspected the Roza's on several tours in Holland and we have seen how well the Roza family has transmitted. Our best bull from the family is Roza 7040, a full brother to Roza 7013. We are marketing him; he is a beautiful bull. We see the family as an interesting alternative for other Holstein families and we have a strong feeling not everything has been said and done as of yet".

## The Schep family

Another quite different pedigreed Roza is milking in the herd of Krijn Jan Polinder in Nunspeet, The Netherlands, who purchased a couple of grade 2 embryos by Roumare from the Schep family. The entire IJsselvliedt herd along with embryos in stock was sold to Jan Schep in Holland after the tragic death of 24 yr old son Gerben Puttenstein in March 2006. At the Schep facilities the Roza's kept performing well and a VG-88 Comestar Export daughter from a VG-87 Aaron from the original Lexus Roza 105, was one of the bull mothers they could work with. These grade two embryos resulted in a very fancy, medium sized VG-87 Roumare daughter that is finishing at 10.300kg 3,8%f and 3,7%p in just 305d. This may well be the highest protein branch of the Roza's as both her dam and grand dam made over 10.000kgM with 3,7%p. The Schep family with herd managers Leendert Koek and Wout Schep are very positive about the Roza's: "We have shown a VG-89 2 yr old Shottle at the NRM Show in Utrecht last year and she was 4-th in the finals. It seems the Champion Roza 7013 VG-87 cow is THE cow to breed from as her daughters are outstanding" Leendert says. The VG-89 Shottle has recently been successfully flushed to Lauthority. "We also showed the VG-88 Toystory and we have several Goldwyns milking that are high VG". Quite a number of Snowman embryos from the Rieten Roumare Roza VG-87 heifer have sold into AI through Diamond Genetics. Her outcross pedigree, high protein% and her 1900g TPI, did certainly help.

## Spread out

Roza 137 EX-92 her Jocko daughter Roza 158 VG-88 did show, she made it to Junior Champion at a CRV Show in 2004, but most of all transmitted extreme yield and satisfying type to the next generation. Like her Laudan daughter Roza 9496 VG-86 in the herd of Wim and Lia Zwambag in Friesland. This Laudan produced over 15.400 kgM with 3,58%f and 3,55%p in just 305 days and in 2nd lactation. Her sons have gone all around Europe with a Jeeves son well over 2000 G TPI owned by AI Total, a Jeeves son in Poland, one at Genus ABS, UK and at least two Jeeves sons in Germany. One, Jackson, has just been released by the VOST. Another son by Ashlar is in the barns of RMV, Germany. Then the first milking daughter of Laudan Roza is another different pedigreed Roza: she is by Sildahl Airraid, classified VG-86

## Carlos Mendez (Ascol)

"We especially like the strength, longevity and production with high components"

and made almost 12.000kgM in 305d. Three Active daughters are in the UK based Bickleygate herd with a full brother at Genus ABS. Laudan has yielded another extreme producer in the Dalbytop herd in England. Dalbytop Laudan Roza is VG-87 and produced 16.600kgM with 2,95f and 3,08%p at 3.01 yrs in 305d. Her dam is a Champion from the full sister to Jocko Roza 158 VG-88. The Roza's have successfully spread out in the UK. A third calf Freelance from a Laibert daughter of Roza 137 EX-92 is now EX-93 in the UK. Also a super milker with nearly 15.000kgM and 3,25%p in 305 days!

## Surprise, surprise!

Surprise, surprise! The original flush with Lucky Leo on the Lexus Roza 105 yielded two more VG full sisters. The Beeze herd of Martien and Lyda van der Kamp in Dalfsen, The Netherlands bought them as

Egbert & Henny Puttenstein

"We are glad we have been able to develop such a dominant cow family"

IJsselvliedt Roza 105 EX-92

Impressive from any angle and foundation cow in the Roza family.

Blarinckhorst Rosalie 2 VG-86 2yr.

Outcross from the Roza's! Dam to the World's #6 GTPI Roumare son: AltaROY

embryos. The Beeze Roza's are solid producers with good type. The highest classified one is a 3rd calver by Taco-RED and from a VG-86 Addison from the VG-89 Lucky Leo in Dalfsen. This Roza has a RED son by Zabing, called Beeze Riberi-RED at KI Kampen. A fresh Jango daughter is VG-85 in the NOG test herd in Karkendamm, Germany. She is from a VG Shottle from the VG-89 Lucky Leo Roza 1 at De Beeze and has been milking over 40 kgs. Martien thinks a Champion daughter of Roza 2 VG-87, his second Lucky Leo, is developing into a key cow in his herd. Her daughters by Survivor, Talent and Toystory are all VG. More Roza's therefore that outperform their herd and age mates, either in the show ring, the milking parlor or as bull mothers. Egbert Puttenstein is proud the Roza's have kept doing so well. "We have been very fortunate with the Roza's and we are glad they do so well now for the Schep family and other breeders. It is one of those families that produce bull mothers able to show and compete at high levels". And as we know: there are never too many of those around.

# Online Embryo Auction

FEB. 28 THROUGH MARCH 5, 2011

*A few examples of the fantastic offerings*

## OFFERING x Gold-N-Oaks Premier Family

STAY TUNED... for a special embryo offering from the great Marbella family at Gold-N-Oaks

## SHAMROCK x Cosmo's Bogart - Larcrest Cookie

Great mating - Shamrocks from Cosmopolitan's high indexing Bogart, Larcrest Cookie-ET GTPI+2109

## IOTA x Ralma Goldwyn Clarinet EX-90

Iota's from the EX-90 Goldwyn daughter of Christmas Fudge and the great Juror Faith family

## JORDAN x GBM Shottle Africa VG-87

Jordans from a potential 7th generation EX with extremely high genomic daughters

## GOLDWYN x Gloryland Lori Rae-ET EX-92

ROXY opportunity from an 8th generation EX Dundee daughter of Lana Rae EX-94 2E

## BRAXTON x Morningview Blur Sabrina EX-92

SEXED Braxton embryos from a high scoring Boliver going back to Celsius Scant

## SHOTTLE x Budjon-JK Electras Elexa VG-89

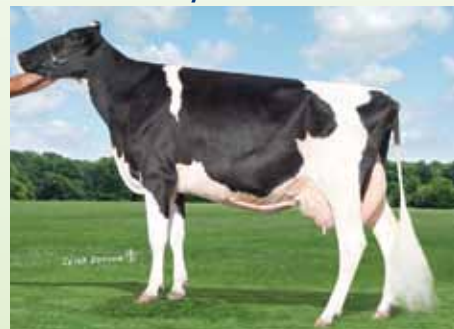

Shottles from the VG-89 Durham daughter of Encore Electra EX-95 2E... a premier show and type family

## JORDAN x Stone-Rise Durham Lizzy EX-95

From the HHM All-American, EX-95 2E GMD DOM Durham Lizzy are two embryo packages by Jordan and Fever

## WINDBROOK x Royola Gold Blaze-ET EX-90

Perfect combination of type and production - Windbrook embryos from the EX-90 Goldwyn with CTPI +1837

**LOG ON** - Auction closes beginning at 12:00 p.m. (EST) on Saturday, March 5, 2011 using the popcorn bidding/8-minute rule system.

## Emerald-Acr-Sa T-BAXTER

# Choose your favorite Baxter daughter

Emerald-Acr-SA T-Baxter was one of the most popular bulls of his time when he came up with his first proof.. Baxter who is owned by Alta Genetics has a great cross as being a Blitz son out of an Mtoto mother. Nowadays Baxter has 4299 dtrs in his American proof and he is still one of the very highest second proof sires of his time with TPI +1795 and PTAT +1.82. Baxter's have been sold for top prices at auctions and currently some of his greatest daughters are much being in high demand for bull dam contracts!

#1 GTPI Baxter World Wide | #4 GTPI Cow Europe | #9 GTPI Cow World Wide (Dec '10)

From the awesome Morningview Converse Judy cow family, which produced proven sires like Morningview Ashlar @ Semex and more!

A special thanks to Mr. Rossetti from All. Nure Farms (IT) for making this great young cow available to us. Do not hesitate to contact us for more information.

If you want production or shine in the showing AMS Genetics is your starting point!**

### **Examples of donor cows that AMS Genetics genetics is working with**

DeBoer Elegant Cally-ET VG-88  
#1 Elegant daughter

L-L-M-Dairy J Stream Procky VG-86-2YR  
#1 Jet Stream daughter

Scientific Darling Rae-ET \*RC VG-85-2YR  
#1 \*RC Cow of the Breed 12/10

Harvue Roy Frosty EX-96  
Supreme Champion - World Dairy Expo  
Working with her daughters!

AMS Genetics has 29 years experience in the sourcing and exportation of Holstein embryos to the World.

Although many things changed over the 29 years, one thing is still a constant, our commitment to our clients to provide great service and to locate and obtain the genetics that they need.

If you are looking to purchase embryos to introduce new genetics into your AI Company or your herd, AMS Genetics will be your partner in sourcing the U.S. genetic base and handling the exportation. We can adapt our selection to emphasis your selection criteria, so we focus on the genetics that will do the best job for your goals.

### **Services:**

Sourcing and locating Embryo Donors  
Herd Visitation Selection Tours
